ZY-Path User Acceptance Testing

Participant instrument and observer record · no responses entered

Participant briefing

Purpose: assess usability for educational/research workflows, not diagnostic accuracy. Participation is voluntary. Stop or decline optional questions at any time. Use authorised, de-identified sample files only.

Participant ID: _____ Date: _____

Consent to participate: Yes / No Anonymised quotation: Yes / No

Recording permission (if requested): Yes / No / Not requested

Background

Role: _____

Pathology experience: None / Occasional / Regular

Programming/AI experience: None / Basic / Intermediate–advanced

Prior pathology-tool use: Yes / No; optional tool: _____

Device and display scale: _____

Task instructions

Attempt the tasks with the prepared image/model files. You may ask for help; the observer records assistance separately.

The tasks evaluate navigation and interpretation of output types. A model prediction is not the answer key for a clinical diagnosis.

Task	Participant instruction	Observer success criterion
T01	Load the supplied image and run Single image with the approved model	Correct image/model/mode and completed output identified without coding
T02	Select Tiled analysis, set the specified source width/height and run	Correct explicit mode and source dimensions are used
T03	Find a tile's class/confidence and explain coverage	Identifies actual tile detail; states coverage is a crop-class area estimate, not pixel ground truth
T04	Compare a selected region with the original and use Fit/zoom	Same source region remains aligned; participant can return to Fit

Task	Participant instruction	Observer success criterion
T05	Inspect the supplied segmentation result	Distinguishes segmentation labels and pixel coverage from classification tiles
T06	Search/date-filter history and restore the nominated record	Correct stored record shown without initiating inference
T07	Change a current preference, then rerun the stored record	Recorded model/mode/parameters used; new record distinguished from restored one
T08	Export the nominated completed result	Correct PNG/PDF and actual task/model metadata identified
T09	Start the supplied workload and cancel it	Recognises request/acknowledgement; no partial completed record saved
T10	Save a supplied validated default and restore the built-in default	Correct task's preference changes; other task/history remain unaffected

Observer record

For each task record elapsed seconds, independent / assisted / unsuccessful / not attempted / blocked, assistance count, critical error and notes. Keep participant identifiers anonymous.

Task	Outcome	Seconds	Assistance	Notes

System Usability Scale

Rate each item: 1 Strongly disagree · 2 Disagree · 3 Neutral · 4 Agree · 5 Strongly agree. Standard SUS wording/order is retained (Brooke, 1996).

1. I think that I would like to use this system frequently. Response: ___

2. I found the system unnecessarily complex. Response: ___

3. I thought the system was easy to use. Response: ___

4. I think that I would need the support of a technical person to be able to use this system. Response: ___

5. I found the various functions in this system were well integrated. Response: ___

6. I thought there was too much inconsistency in this system. Response: ___

7. I would imagine that most people would learn to use this system very quickly. Response: ___

8. I found the system very cumbersome to use. Response: ___

9. I felt very confident using the system. Response: ___

10. I needed to learn a lot of things before I could get going with this system. Response: ___

Feature ratings

For features you used, rate clarity/ease from 1 Very difficult/unclear to 5 Very easy/clear. Choose Not used where appropriate. These items are separate from SUS.

Model selection 1 / 2 / 3 / 4 / 5 / Not used

Mode tile settings 1 / 2 / 3 / 4 / 5 / Not used

Legend statistics 1 / 2 / 3 / 4 / 5 / Not used

Tile details 1 / 2 / 3 / 4 / 5 / Not used

Comparison linked 1 / 2 / 3 / 4 / 5 / Not used

Segmentation 1 / 2 / 3 / 4 / 5 / Not used

History rerun 1 / 2 / 3 / 4 / 5 / Not used

Export 1 / 2 / 3 / 4 / 5 / Not used

Cancel progress 1 / 2 / 3 / 4 / 5 / Not used

Settings help 1 / 2 / 3 / 4 / 5 / Not used

Open feedback

Which part was easiest?

_____

Which part was confusing?

_____

Was a statistic or colour meaning unclear?

_____

Could you recover from an error or cancel safely?

_____

What would you change first?

_____

Would you use the system for the stated educational/research task? Yes / Maybe / No; why?

_____
